# Embracing Change

An Approach to Cybersecurity in today's Digital Landscape

The way we work is changing. Remote work, digital transformation, and data-driven insights are reshaping our world.
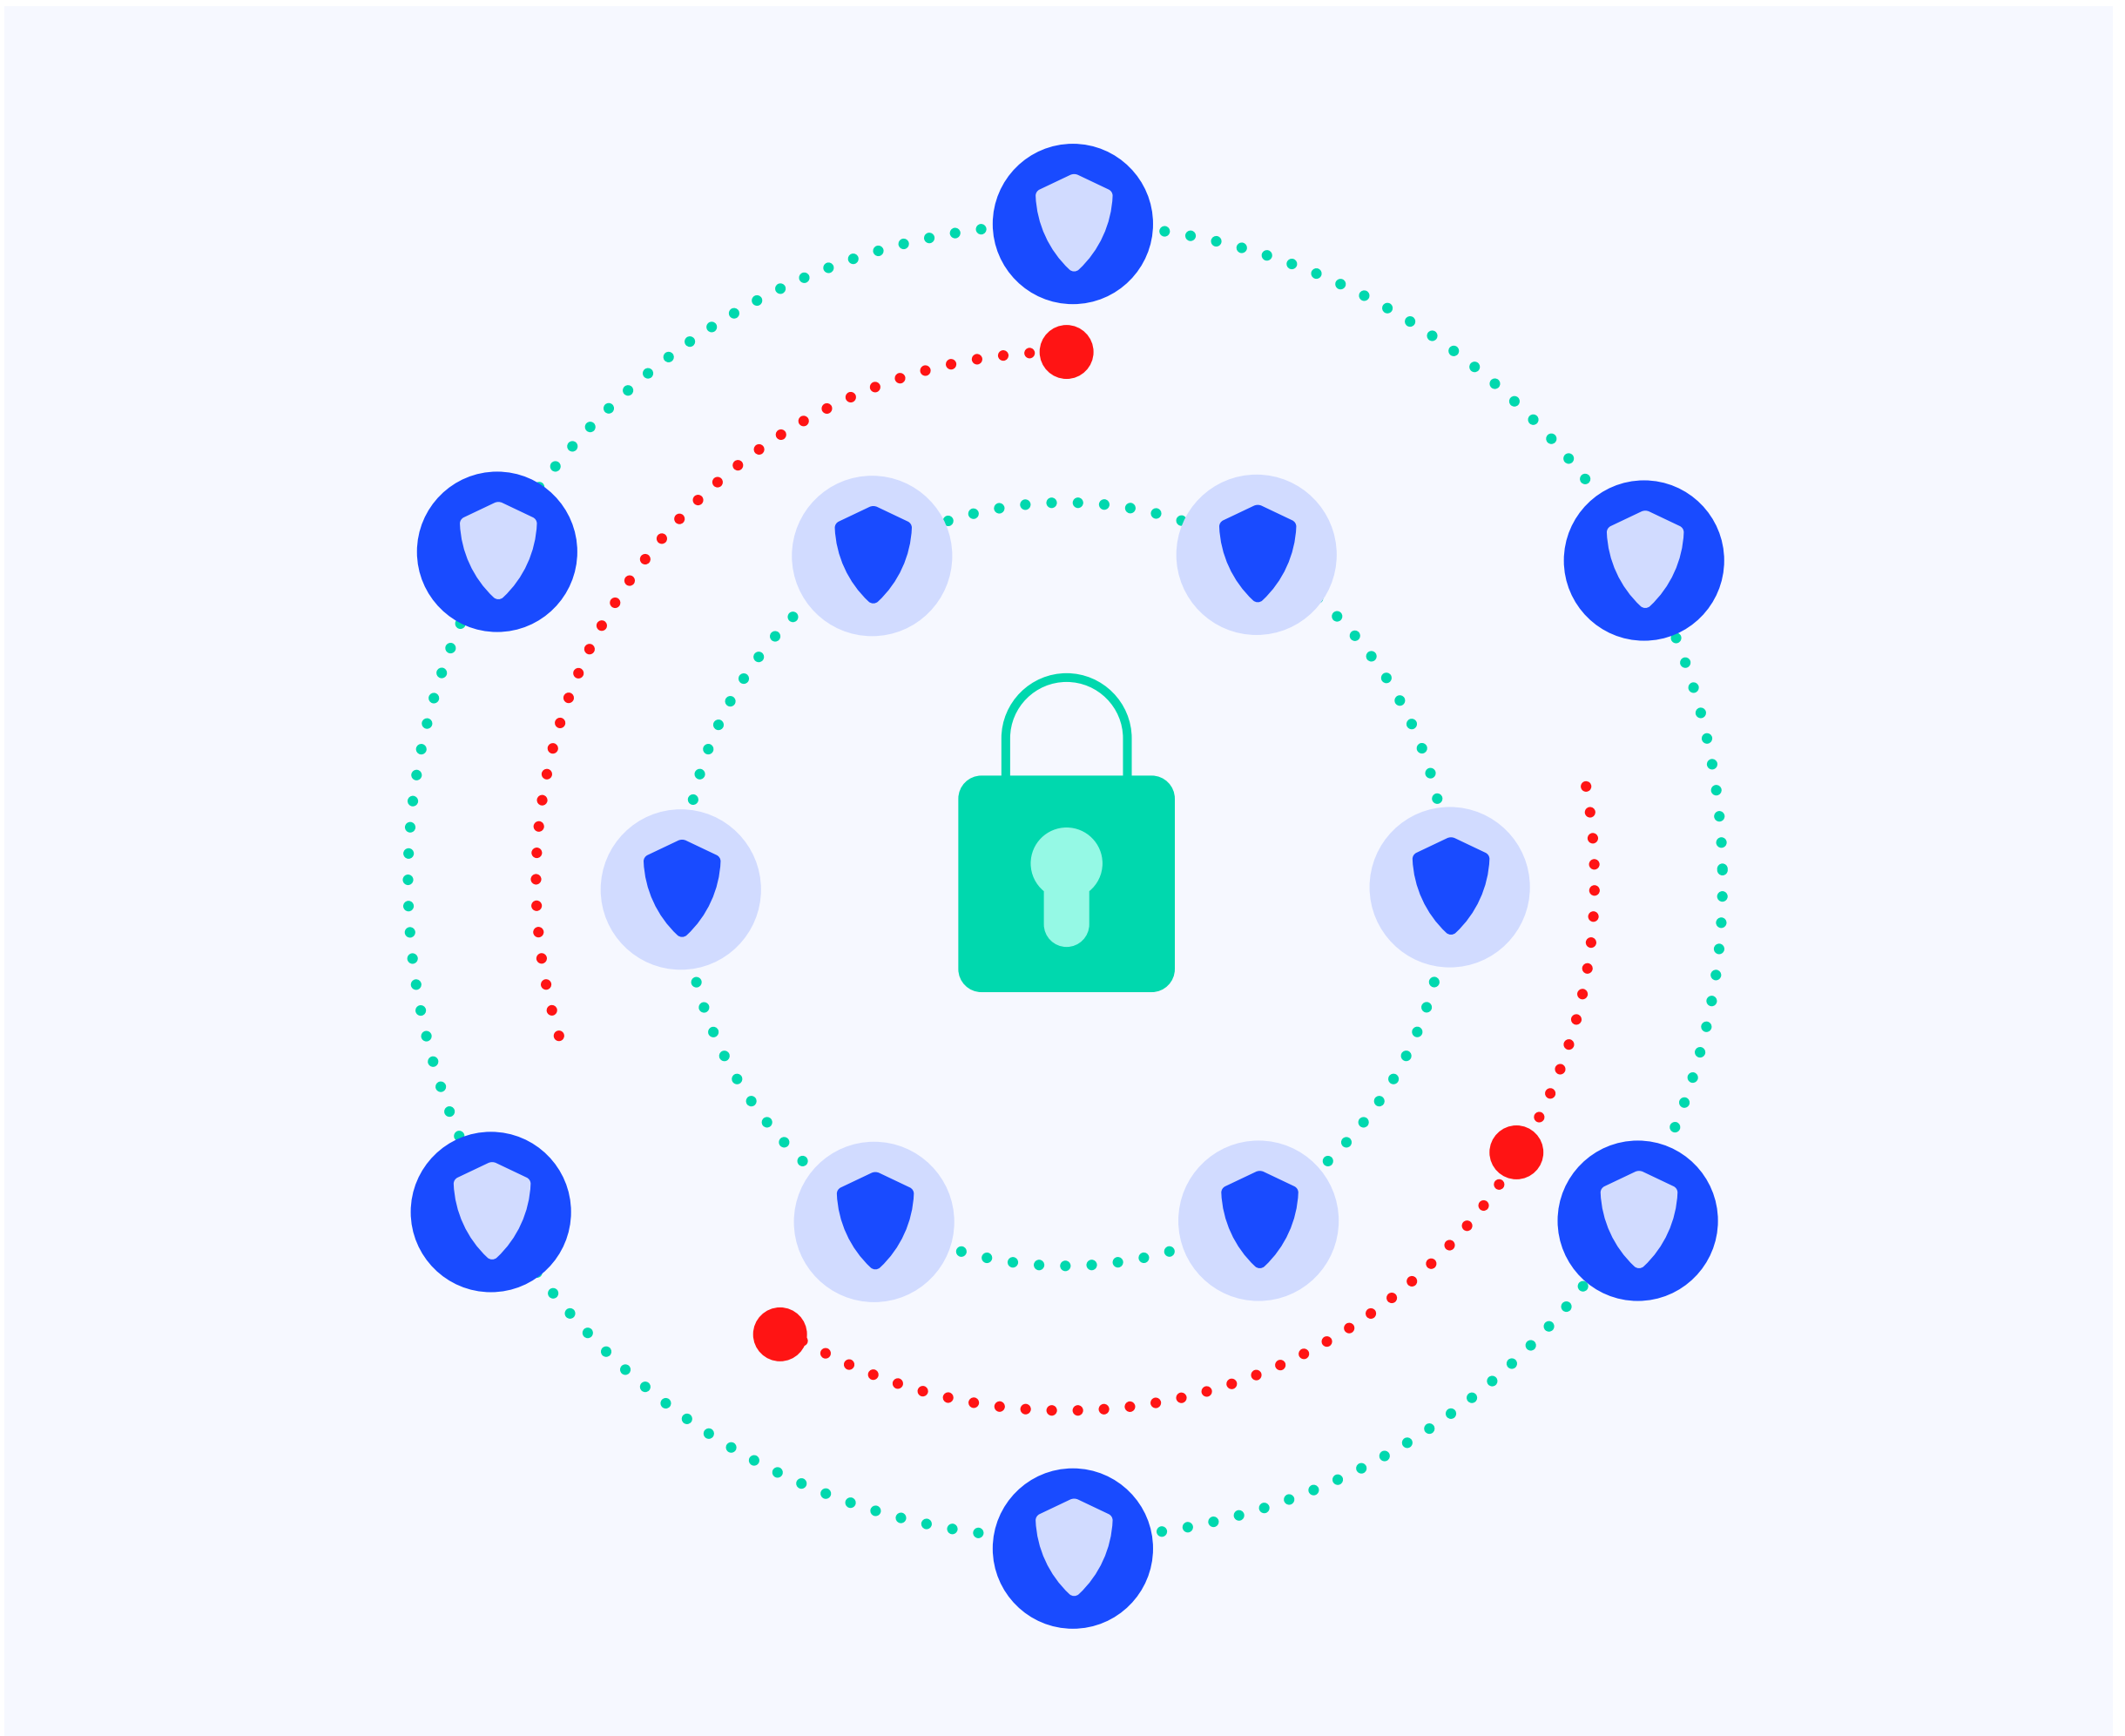

The Challenge

Traditional security methods struggle to keep pace with evolving threats. Firewalls and web filters are no longer enough.

81%

of IT Professionals still rate "Security threats" as their top challenge, according to our Tech Trends Report 2024.
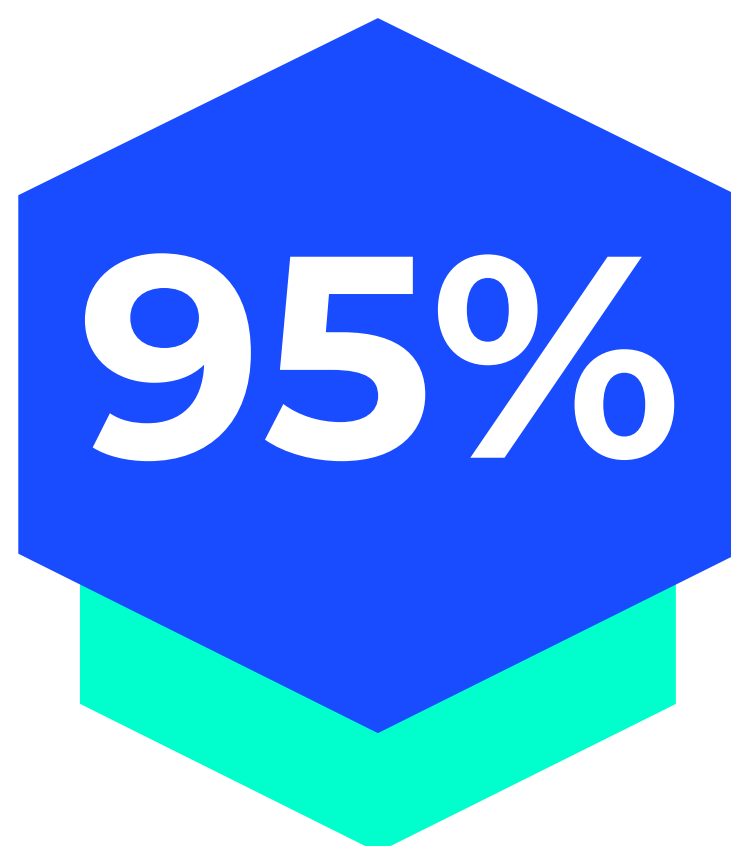

Our Solution

Enter Zero Trust Architecture (ZTA). It's all about "never trust, always verify." Verify identities and devices before granting access.

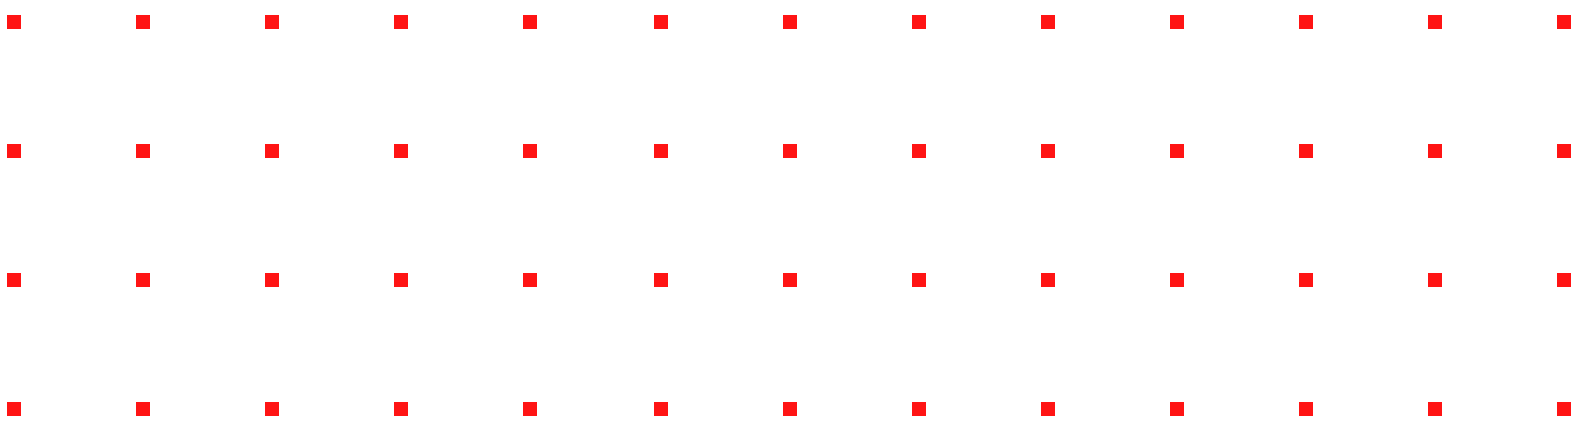

Data Breaches

Recent breaches highlight the critical role of privileged access. CyberArk's PAM solutions mitigate these threats.
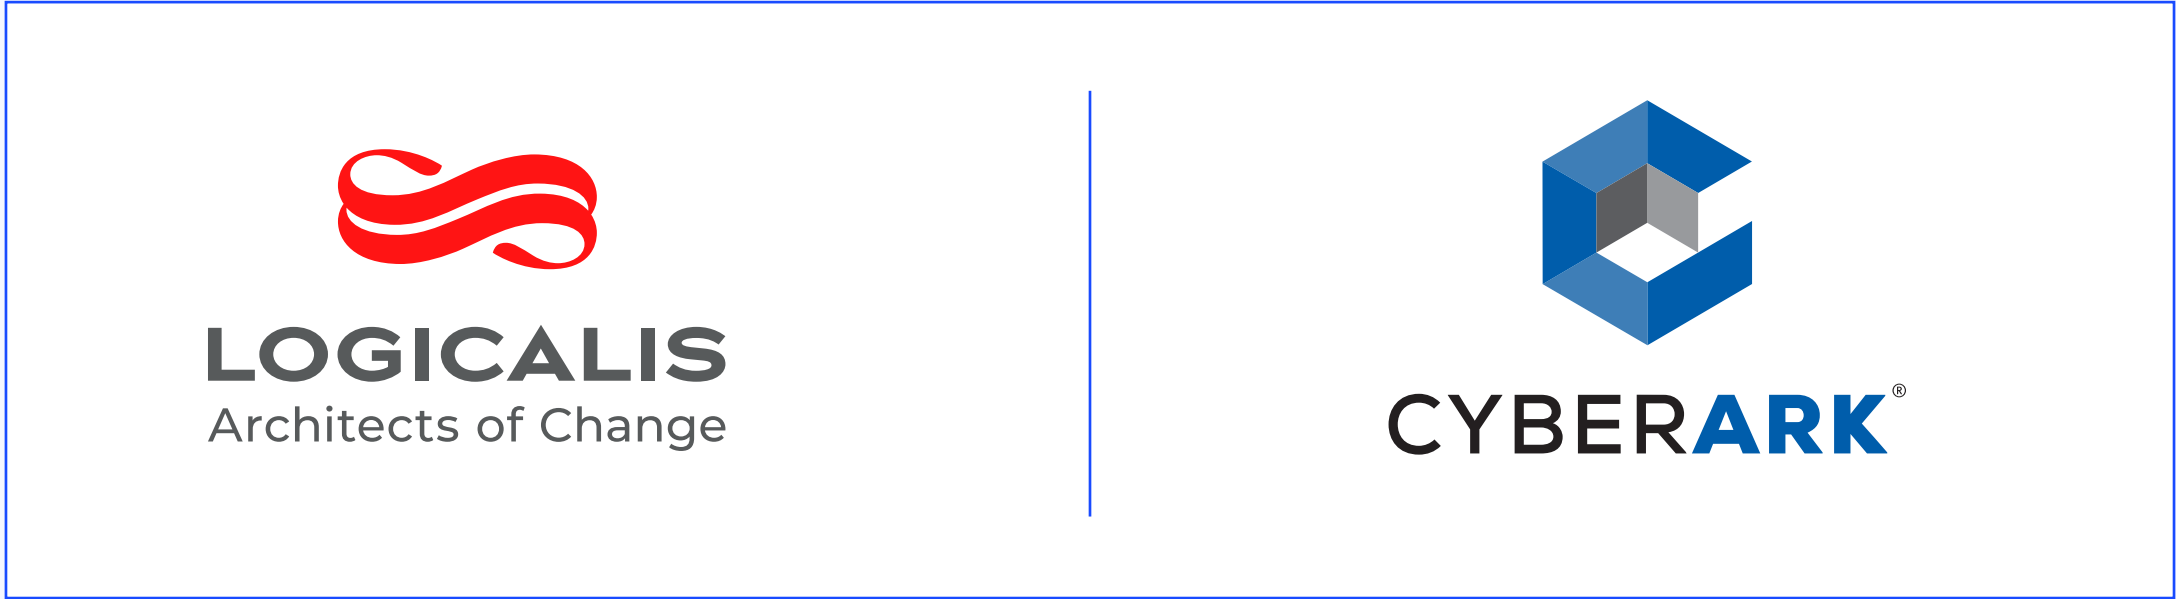

95%

of IT Professionals report that their organisation has deployed at least one security product / service in the past 12 months, according to our Tech Trends Report 2024.

Logicalis partners with **CyberArk**, a leader in Privilege Access Management solutions, aligning with the principals of Zero Trust Architecture.
